Despite evidence demonstrating how central girls' education is to development, gender disparities in education persist. Around the world, 132 million girls are out of school, including 34.3 million of primary school age, 30 million of lower-secondary school age, and 67.4 million of upper-secondary school age.

**Girls' education | UNICEF**

Tu, 2002). Social presence also promotes comfort and emotional connections among learners in online learning environments (Aragon, 2003). Perceptions of social presence are influenced by the design and characteristics of online learning contexts (i.e., social affordances; Kreijns, Kirschner, Jochems, & van Buuren, 2007).
